

Prepress Client on Mac OS X El Capitan
Prepress

Urgency	Classification	Scope
High	Support info	Field Service

1. Summary

Does Agfa support the new Mac OSX El Capitan for the Prepress Macintosh client?

2. Solution

The Prepress Macintosh Client installer for Prepress 9.0.0 and earlier do not work on the new OS.

We have made the required fixes in the Client installers that will be created for the next Prepress version (9.1.0).

Therefore we do not officially support this OS in Prepress 9.0.0 and earlier.
